SPRINT 2

creating web application using RED node

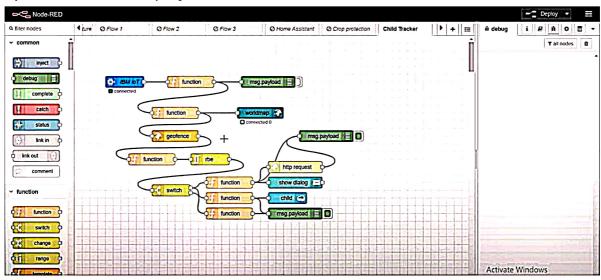

TEAM ID	PNT2O22TMID5O3OO
PROJECT NAME	IOT BASED SAFETY GADGET FOR CHILD SAFETY
	MONITORING AND NOTIFICATION

Aim:

Develop the web application using Node-RED Steps

Followed:

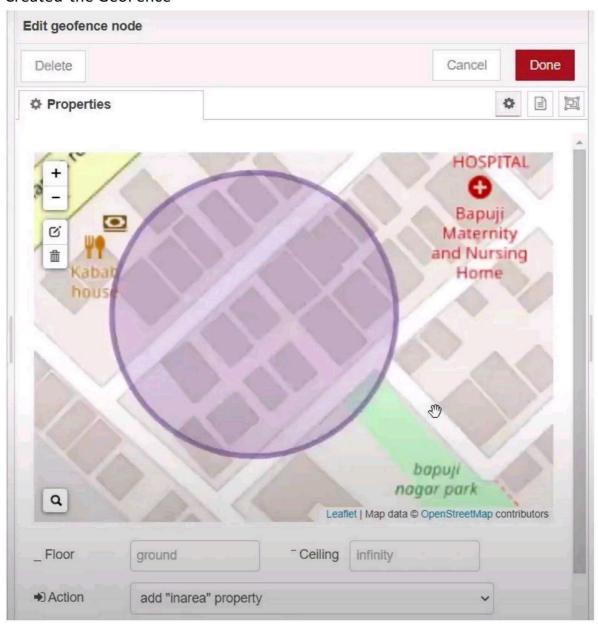

Opened a Node-RED project

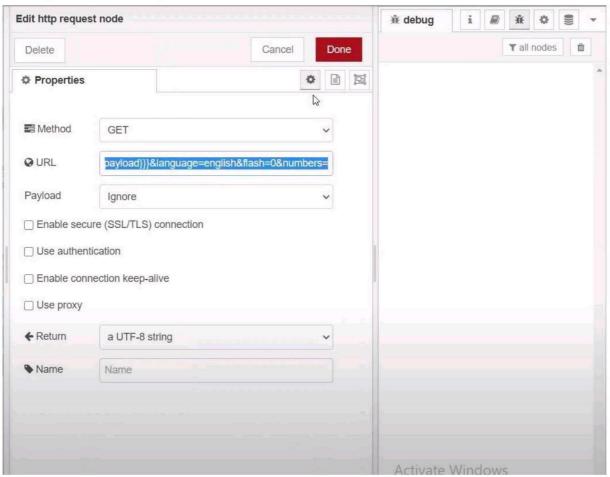

Added code to get child location in python

```
import json
import wiotp.sdk.device
import time
myConfig = {
    "identity": {
    "orgId": "hj5fmy",
    "typeId": "NodeMCU",
         "deviceId": "12345"
    "auth": {
         "token": "12345678"
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()
Thile True:
        name= "Smartbridge"
        #in area location
        latitude= 17.4225176
        longitude= 78.5458842
        #out area location
        #latitude= 17.4219272
        #longitude= 78.5488783
        myData={'name': name, 'lat':latitude, 'lon':longitude}
        client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
        print("Data published to IBM IoT platfrom: ",myData)
        time.sleep(5)
client.disconnect()
```

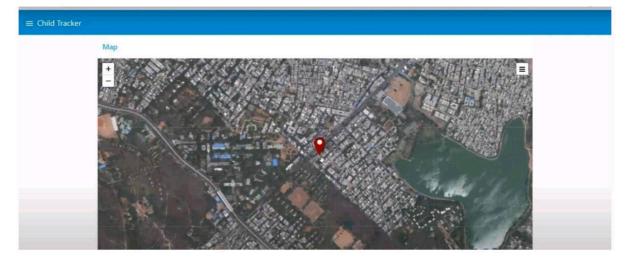

• Created the GeoFence

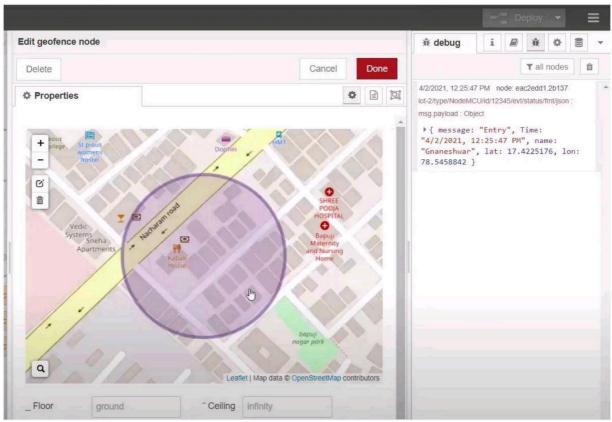

• Editing the HTTP Request URL

• Located the child

Created the geofence node

Python script sending requests to IBM Cloud

```
A × IPython console
Editor - C:\Users\HP\Desktop\child.py
                                                                                                     Console 2/A 🔯
child.py
                                                                                                     Data published to IBM IoT platfrom:
1 import json
                                                                                                     Data published to IBM IoT platfrom:
   2 import wiotp.sdk.device
                                                                                                     Data published to IBM IoT platfrom:
